For over 15 years, Book Systems, Inc. has been a one-stop shop for total library automation. Our philosophy

is simple: we write our products well, test them thoroughly, sell them with confidence, and support them with pride and enthusiasm—all with the understanding that the customer comes first. We provide products that assist libraries of all kinds with the easiest way to automate and manage their daily activities. Concourse, our Windows-based ILS program, has become our most “feature-rich” and “easy-to-use” product, and can bring any library into the 21st century. This program allows users to put their card catalog online, build reports that will help maintain and track a library’s collection, and much more. Atrium, our web-based program, is the next generation of ILS, offering centralized solutions at an affordable price. We are confident that customers will be thrilled with our integrated software solutions and absolute commitment to service and satisfaction.

Since 1969, Checkpoint Systems, Inc. has protected library materials in high schools, colleges and universities, as well as a variety of specialized library service

environments. Product offerings include radio-frequency based and electromagnetic Electronic Article Surveillance (EAS) systems, video surveillance systems, patron self-checkout systems, and a selection of SAFERS (reusable security packaging).

Checkpoint's Intelligent Library System uses RFID technology to automate library processes. With circulation circuits tracking your collection, patrons can check out and check in books and materials without staff assistance. In addition to saving staff time, the Intelligent Library System automates the electronic sorting of books and inventory of your entire collection.

Cuadra STAR customizable knowledge management applications provide fast, precise retrieval and flexible task management. Ready-to-run STAR solutions are available for library, archival, museum, and photographic collections, as well as competitive intelligence and records management data.

The STAR/Libraries integrated library system includes a powerful request-handling module linked to the Web OPAC, as well as support

for both digital and non-electronic collections.

STAR runs under Windows, UNIX and Linux and supports multiple interface options, for browsers, Windows, and Z39.50 clients or gateways. Multiple programmer interface options are available. The STAR-DB option lets you use a relational DBMS (e.g., Oracle, MS SQL Server) of your choice.

The STAR ASP Service is a hosted service that gives you full access over the Internet to manage your information and provide complete and precise browser-based access to your collections. You manage your data and we take care of everything else.

EOS International is a leading global library automation and services provider serving the needs of corporate, legal, medical, government and special libraries. Our solutions were designed with the five tests of successful library automation software in mind: usability, reliability, easy maintenance, adherence to library standards, and affordability.

EOS' scalable solutions enhance the economic value of our clients' knowledge assets. Librarians need easy and efficient access to information, industry and standards support, and quick and effective technical support in order to run a knowledge-based profit center for their organization. EOS local and ASP hosted solutions include:

- **EOS.Web Express—Our entry-level Microsoft .Net, Web-based solution for small to medium-sized libraries**
- **EOS.Web Enterprise—Our premier, Microsoft .Net, Web-based solution for large-sized libraries**
- **EOS Q-Series—Our client/server, integrated library solution for mid-size to large libraries**
- **EOS GLAS—Our modular solution for small to mid-size libraries**
- **EOS e-Library Service—Our cost-effective, ASP hosted service for EOS.Web Express, EOS.Web Enterprise, EOS Q-Series and GLAS**

For thirty years and with a staff that is 30% professional librarians, GIS has supported libraries with innovative technology, from our first circulation system in the mid-1970s through the third-generation Windows-based Polaris integrated library system. Ranked by users as number one in customer support, Polaris provides integrated cataloging, circulation, acquisitions, and serials control plus customizable system administration. The Polaris PAC offers advanced searching and access to enhanced content such as book jacket images, reviews, and tables of contents. Polaris seamlessly integrates leading third-party products to enhance service and increase productivity with capabilities like virtual reference; PC management; thin clients; check-in, sorting and conveyor systems; collection agency management; and EDI with your book vendors. With embedded metasearch capabilities, patrons can search the library's catalog, the web, other library catalogs and Z39.50 databases at one time using one common interface. Large or small, single library or consortia, Polaris belongs in your library!

Inmagic, Inc.'s software solutions enable information professionals to manage and deliver enterprise content, seamlessly integrate internal and external content sources and deploy

business-critical information to corporate portals, intranets, extranets and the Web. Our newest offering, Inmagic Genie, is a Web-based library management system. Genie is browser-based for availability 24/7. It supports back-office library management needs while offering self-service capabilities for end users. Genie, which runs on the Inmagic Content Server platform, is designed to be used by both library professionals and end users and requires minimal IT support. Inmagic GathererPLUS, a spider that crawls unstructured content located on internal file servers and the Web, extracts content and creates meta-data to make content accessible and useable. Inmagic Profiler, a current awareness and alerting tool, enables information professionals to push relevant content directly to business users' desktops based on individual profiles.

INNOVATIVE
interf a c e s

Celebrating its 25th anniversary, Innovative Interfaces, Inc. is the world's leading provider of Web-powered, Java-based automated library systems, with systems installed in thousands of libraries in 40 countries worldwide. Innovative's flagship product, Millennium, provides the most complete and powerful array of reliable, flexible, and user-friendly features for libraries and their patrons. Innovative also offers a complete suite of digital library solutions as optional modules such

as: Millennium Access Plus (smart linking, meta-searching, and remote patron authentication), INN-Reach (resource sharing), and Electronic Resource Management (e-serials management). Innovative also offers Via, a product especially for the K-12 market. Millennium is appropriate for libraries of all kinds and sizes and all of our customers receive 24/7/365 support. This year's Millennium Silver Release (2004) includes new features such as XML Harvester, Basic Ecommerce, Online Patron Registration, Mobile Collections, External Patron verification, and more.

OCLC is a worldwide library cooperative, helping libraries in more than 84 countries provide users with bibliographic, abstract and full-text information when and where they need it. Our digitization and preservation, eContent, cataloging, reference and resource sharing services help libraries improve the flow of materials from the publisher to the end-user.

At the core of these services is WorldCat, the world's most comprehensive bibliographic database, which is cooperatively produced and maintained by OCLC and its member libraries.

NetLibrary is our eContent platform that includes eBooks, eJournals and eResources to help you serve your users, wherever they are. QuestionPoint, our virtual

reference software, can help you manage your total reference solution. OCLC also maintains the Dewey Decimal Classification system.

Visit www.oclc.org to learn more about OCLC, become a member and discover how our cooperative services can help your library.

<http://www.techbooks.com>

TechBooks is a fast-growing global company committed to delivering tomorrow's publishing technology to our clients today. We offer high-quality composition services, a front-end XML workflow process that speeds cross-media projects, and a full range of data, document and digital conversion services, including imaging, to publishers, information aggregators, professional societies, service bureaus, financial institutions, government agencies, universities and major corporations. TechBooks has a depth of experience working with HTML, SGML and XML, including TEI-Lite and EAD, along with a variety of e-Book formats. The company also is known for its offshore business model in which TechBooks employs skilled professionals in India, coordinated by U.S.-based project managers, to prepare content for large projects. Founded in 1988, TechBooks employs more than 2,200 people worldwide and earns more than \$50 million in annual sales revenues. We rank among the Inc. 500 fastest-growing companies, the Virginia Business Fantastic 50 and the Greater Washington Fast 50.

<http://www.TLCdelivers.com>

The Library Corporation is owned and operated by the family that founded the company 30 years ago. TLC offers integrated automation systems built using the world's most advanced technologies, cataloging with sophisticated features, acquisitions that incorporate the necessary resources into one place, and a premier service and support team that sets the standard in the library profession.

TLC's integrated system, Library•Solution, provides robust functionality to libraries of all types and sizes. Learn why it's the choice of thousands of libraries. CARL•Solution is the premier automation system for large libraries and consortia. Some of the busiest libraries use CARL•Solution, including: National Library of Singapore, Denver Public Library, and Los Angeles Public Library.

Collection developers can use the Online Selection Assistant, a vendor-neutral online collection development and information management solution. For your cataloging needs, ITS•MARC Web or CD-based cataloging offers easy editing, daily updates, and access to millions of MARC records.
