

PRODUCTS AND SERVICES BY VENDOR

This section contains a lot of coded information. Here's what it all means:

In all of our Software categories, we gave vendors the option of checking off five platforms: Windows 98, Windows NT, Mac, Unix, and Other. Hence, each product that is software will be followed by any or all of the cor-

responding codes (98/NT/M/U/O). This way you can know immediately if a piece of software that you'd like to buy will run on your library's system.

Also, we asked vendors to provide more detailed data under two specific software categories: Integrated Library Systems Software and

Network Operating System Software. In the boxes below you can see the choices that we offered, and then under each vendor's listing you can tell exactly what sort of IOLS and Operating System software it sells.

We hope these details will be helpful to your purchasing decisions.

Integrated Library Systems Software

Architecture:

Client/Server Host/Terminal Stand-alone Other

Operating System:

IBM Mainframe Mac-Based NT Server Unix-Based Other

Market:

Academic Consortia K-12 Public Library Special/Corporate Other

Network Operating System Software

Novell NetWare Unix Variant Windows NT Other
