Technology and Knowledge Forum:
A Look at Dead and Emerging Technologies

Since we are now firmly in the knowledge age, and organizations and communities are striving to become learning organizations and centers, librarians are even more critical to the transfer of knowledge in these learning environments. Our popular "dead technology" session focuses this year on those technologies that will, and will not, allow us to transfer knowledge to our clients in easy, cost-effective, and relevant ways. This session features Computers in Libraries experts, pioneers, and practitioners. It is free and open to all registrants, exhibitors, and exhibit visitors. Come and hear our panels' predictions of future-challenged technologies as they praise and condemn available and emerging technologies.

Moderator: **D. Scott Brandt,** Purdue University
