<b>Title:</b> Sharing, Privacy and Trust in Our Networked World
<b>Published:</b> September 2007
<b>By:</b> OCLC
<b>Contributors:</b> Cathy De Rosa, Joanne Cantrell, Andy Havens, Janet Hawk, Lillie Jenkins, Brad Gauder, Rick Limes, Diane Cellentani, Tam Dalrymple, Larry Olszewski, Sam Smith, Tom Storey
<b>Summary:</b> The practice of using a social network to establish and enhance relationships based on some common ground—shared interests, related skills, or a common geographic location—is as old as human societies, but social networking has flourished due to the ease of connecting on the web.

<b>Title:</b> The New Social Order
<b>By:</b> The 451 Group [ <a href="http://www.the451group.com">http://www.the451group.com</a> ]
<b>Contributor(s):</b> Kathleen Reidy
<b>Summary:</b> This report analyzes survey data to uncover what's really going on in the much-hyped world of social software, or Enterprise 2.0. It uncovers important trends about what types of enterprises are really investing in blogs, wikis, and social networking technologies today and for what kinds of initiatives. It also finds strong vendor preferences among enterprise users, even though the market is still immature. Findings are analyzed with a specific focus on vendors, investors, and IT buying organizations.

<p><b>Title:</b> Wikis at Work</p>
<p><b>Published:</b> August 2007</p>
<p><b>By:</b> Yankee Group [<a href="http://www.yankeegroup.com">http://www.yankeegroup.com</a>]</p>
<p><b>Contributors:</b> Jonathan Edwards</p>
<p><b>Summary:</b> “Social software is software that we really can't use if we're not on the network or that's not useful to us just sitting in front of an isolated PC.” That statement by Harvard Business School associate professor Andrew McAfee—an expert on social software and the originator of the term “Enterprise 2.0”—sums up the nature and allure of social networking and the power of social software applications such as wikis to connect people on common, internet-enabled platforms for collaboration and communication purposes. Isolated software has its place in the enterprise; but social software—through the power of network effects—has the ability to unlock and unleash valuable latent knowledge.</p>

<p><b>Title:</b> Corporate Use of Web 2.0 Technologies</p>
<p><b>Published:</b> January 2008</p>
<p><b>By:</b> ChangeWave [<a href="http://www.changewave.com">http://www.changewave.com</a>]</p>
<p><b>Summary:</b> A recent ChangeWave survey took a close-up look at corporate use of Web 2.0 technologies, including blogs, wikis, social networks and collaborative tagging. A total of 2,081 Alliance members participated in the survey, of which 665 work for companies that currently use or plan to use what we collectively refer to as Web 2.0 social software.</p>

<b>Title:</b> Enterprise 2.0: How Web 2.0 Technologies Will Transform Applications in the Enterprise Workplace
<b>Published:</b> September 2006
<b>By:</b> IDC [ <a href="http://www.idc.com">http://www.idc.com</a> ]
<b>Summary:</b> This IDC presentation explores IDC's views on how Web 2.0 technologies will inspire changes in the way enterprise applications are designed, deployed, and used. It looks at the opportunities and challenges facing vendors as Web 2.0 goes to work as Enterprise 2.0 in what it calls the enterprise workplace. It was presented at IDC's Enterprise 2.0 event at the Interdisciplinary Center Herzliya in Israel on September 5, 2006.

<b>Title:</b> Who's Who in Enterprise Social Software
<b>Published:</b> July 2007
<b>By:</b> Gartner [ <a href="http://www.gartner.com">http://www.gartner.com</a> ]
<b>Contributors:</b> Nikos Drakos, Anthony Bradley
<b>Summary:</b> This report profiles the most prominent vendors with social software products for enterprise use, including specialist vendors, large enterprise vendors, and open source products.
<b>Cost:</b> \$195
<b>Size:</b> 14 pages

<b>Title:</b> The Emerging Enterprise Social Software Marketplace
<b>Published:</b> July 2007
<b>By:</b> Gartner [ <a href="http://www.gartner.com">http://www.gartner.com</a> ]
<b>Contributors:</b> Nikos Drakos, Tom Eid
<b>Summary:</b> Enterprise social software is forecast to have a compound annual revenue growth of 41.7% through 2011. Investments are expanding beyond blogs and wikis to include social software platforms, bookmarking, communities of practice, discussion forums, expertise location, and information feeds.

<b>Title:</b> Walking the Fine Line Between Chaos and Control in the World of Enterprise Web 2.0
<b>Published:</b> February 2008
<b>By:</b> Forrester [ <a href="http://www.forrester.com">http://www.forrester.com</a> ]
<b>Contributors:</b> Rob Koplowitz, Erica Driver, with Connie Moore, Jamie Barnett
<b>Summary:</b> Information and knowledge management professionals (I&KM pros) have long focused on gaining greater control over information across the enterprise. This imperative has only grown stronger in an era affected by compliance, security, and privacy requirements. Against this backdrop, the software tools that are facilitating the emerging trend of technology populism are making control over information difficult if not impossible to achieve. To drive new business value without placing the organization or its leadership at risk in the face of the developing tension between the need for control and technology that seems to induce chaos will require steady involvement and guidance from I&KM pros.

<b>Title:</b> Top Enterprise Web 2.0 Predictions For 2008
<b>Published:</b> February 2008
<b>By:</b> Forrester [ <a href="http://www.forrester.com">http://www.forrester.com</a> ]
<b>Contributors:</b> G. Oliver Young with Ellen Daley, Rob Koplowitz, April Lawson
<b>Summary:</b> The enterprise Web 2.0 market, which includes the deployment of tools such as blogs, wikis, and social networking within the enterprise, was a growing force in enterprise software in 2007. While the market is still quite immature, it will continue to gain importance in 2008 as an increasing number of firms look to enterprise Web 2.0 tools to solve long-standing information worker problems. As a result, Forrester expects to see strong demand growth for tools such as enterprise RSS and social networking, an increased role for IT departments in technology acquisition, and steadily growing revenue from current deployments. The market will remain volatile, but Forrester expects mid-tier software vendors, consultancies and systems integrators, and Microsoft to reap the biggest rewards in the coming year.

<b>Title:</b> Social Media Best Practices: Profiles and Recommendations
<b>Published:</b> April 2007
<b>By:</b> Shore Communications [ <a href="http://www.shore.com">http://www.shore.com</a> ]
<b>Contributor:</b> John Blossom
<b>Summary:</b> What makes social media work in today's online publishing? What are the best practices for social media? To answer these questions Shore conducted an analysis of leading and emerging websites that use social media as a key attribute in their offerings. We looked at not just the trendy online consumer portals but as well key offerings in business media and older services that have made good use of social media to establish the value of their publications. This report outlines key best practices for social media publishing, as developed through an analysis of nine leading websites that incorporate social media offerings. The report provides detailed profiles of social media features found in ALM Legal Weblogs, Amazon.com, Flickr, ITtoolbox, LinkedIn, Newsvine, VerdictSearch, Wikipedia, and Zagat, as well as 16 key best practices recommendations for social media site development, further summarized into a 2-page checklist for reviewing your own product plans.
